

Plastic Solutions From Interstate Plastics

Choose the industrial components designed specifically for real world industrial environments.

Choose Interstate Plastics'

Higher Performance MaxGlyde™

Featuring:

Outrigger Pads

Plywood splinters & rots, Steel Rusts, Aluminum is expensive

Interstate Plastics provides real world solutions for your wear application requirements. Outrigger pads made from MaxGlyde™ EF will not splinter like plywood, do not rot over time or hold moisture. Made from MaxGlyde™ EF, an Eco-Friendly version of UHMW, MaxGlyde™ all-polymer pads are extremely resilient. Steel and Aluminum pads corrode, discolor and are heavy, difficult to replace and expensive to purchase and maintain..

Now in Nylon, too.

Features:

- ◆ Apply the Right material for your application
- ◆ 85% lighter than steel pads
- ◆ Chemically inert, serviceable from 180° F to -250° F
- ◆ Corrosion, chemical, wear and moisture resistant.
- ◆ Non-stick surface, easy to clean.
- ◆ Compressive loads vary by material

Benefits:

- ◆ Works well in sub zero temperatures
- ◆ Easy to mount, replace
- ◆ Reduced downtime.
- ◆ Lower maintenance costs.
- ◆ Cost Efficient compared to Steel or Aluminum

Products:

- ◆ Available in Any Thickness required up to 6" Special blends available—show us your problem application Colors available . Black and white are standard
- Any size Pad up to 6 Inch thick and 8 feet wide and 20 feet long.**
